**Math Unit 6: Integers and the Coordinate Plane****6.4-Absolute Value****SWBAT:****Paraphrase:****Essential Question:** How can you describe how far an object is from sea level?**Vocabulary****Absolute Value:**

Absolute value DOES NOT mean opposite-it is ALWAYS positive!

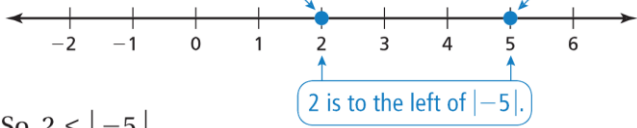

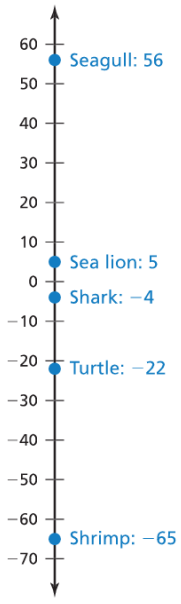

**Example 1****a. Find the absolute value of 3.**

So,  $|3| = 3$ .

**b. Find the absolute value of  $-2\frac{1}{2}$ .**

So,  $|-2\frac{1}{2}| = 2\frac{1}{2}$ .

**Your Turn****a. Find the absolute value of -10****b. Find the absolute value of 8.3**

Example 2	<p><b>Compare 2 and <math> -5 </math>.</b></p> <div style="text-align: center;"> <div style="display: inline-block; border: 1px solid black; border-radius: 10px; padding: 2px; margin: 5px;">Graph 2 on a number line.</div> <div style="display: inline-block; border: 1px solid black; border-radius: 10px; padding: 2px; margin: 5px;">Graph <math> -5  = 5</math> on a number line.</div> </div>  <p>So, <math>2 &lt;  -5 </math>.</p>												
Your Turn	<p><b>Compare <math> -10 </math> and 4.</b></p>												
Example 3	<div style="display: flex; align-items: flex-start;"> <table border="1" style="margin-right: 20px;"> <thead> <tr> <th>Animal</th><th>Elevation (ft)</th></tr> </thead> <tbody> <tr><td>Shark</td><td>-4</td></tr> <tr><td>Sea lion</td><td>5</td></tr> <tr><td>Seagull</td><td>56</td></tr> <tr><td>Shrimp</td><td>-65</td></tr> <tr><td>Turtle</td><td>-22</td></tr> </tbody> </table> <div> <p><b>The table shows the elevations of several animals.</b></p> <p><b>a. Which animal is the deepest? Explain.</b></p> <p>Graph each elevation.</p> <p>The lowest elevation represents the animal that is the deepest. The integer that is lowest on the number line is -65.</p> <p>So, the shrimp is the deepest.</p> </div> <div style="margin-left: 20px;">  </div> </div>	Animal	Elevation (ft)	Shark	-4	Sea lion	5	Seagull	56	Shrimp	-65	Turtle	-22
Animal	Elevation (ft)												
Shark	-4												
Sea lion	5												
Seagull	56												
Shrimp	-65												
Turtle	-22												
	<p><b>b. Is the shark or the sea lion closer to sea level?</b></p> <p>Because sea level is at 0 feet, use absolute values.</p> <p><b>Shark:</b> <math> -4  = 4</math>      <b>Sea lion:</b> <math> 5  = 5</math></p> <p>Because 4 is less than 5, the shark is closer to sea level than the sea lion.</p>												
Your Turn	<p>The table shows the elevations of a bird and a fish. Which is closer to sea level?</p> <table border="1" style="margin: 10px auto;"> <thead> <tr> <th>Animal</th><th>Elevation (ft)</th></tr> </thead> <tbody> <tr><td>Bird</td><td>10</td></tr> <tr><td>Fish</td><td>-9</td></tr> </tbody> </table>	Animal	Elevation (ft)	Bird	10	Fish	-9						
Animal	Elevation (ft)												
Bird	10												
Fish	-9
